VOL. XVII | RICHMOND, CALIFORNIA, FRIDAY, MARCH 5, 1920 | No. 10

Standard Oil Co. For California Prosperous

Kingsbury's Figures Show Increased Profits

President K. R. Kingsbury in his review of the operations of the Standard Oil Company of California for the year 1919, says that the earnings, after deducting all operating and marketing expenses were $48,566,327.59. From this there was written off for depreciation $4,207,328.01, and for depletion $3,968,892.30—a total of $8,176,220.31.

There was also deducted for income and excess profits tax an estimated amount of $9,327,339.38, leaving a net profit carried to surplus of $31,062,767.90, or 19.69 per cent on invested capital and surplus as of December 31, 1919.

Soldiers Exempt From Taxation

The concession given to soldiers who served the United States in the late war is a small reimbursement when it is considered that the American army and navy saved the allies from humiliation and defeat. The $1000 reduction in tax assessment allowed soldiers is only a bagatelle commensurate with the performance of Contra Costa county soldiers on the battlefields of France.

County Assessor Geo. O. Meese or any of his deputies will aid all soldiers who served in the world's war in securing their exemptions from taxation.

Stege Corners Cafe Close For Year

After a suit occupying two days in Superior Judge Latimer's court, the Grand Central Cafe at Stege corners was ordered permanently closed for one year under the red-light abatement act, and the owner, Joseph Lavinge, permanently enjoined from conducting the place.

The suit was prosecuted by H. V. Alvarado, assistant district attorney.

Nothing Doing at City Clerk Faris' Store

Nearly all of the army goods that the council desired to purchase have failed to arrive at the quartermaster department in San Francisco, and about all there is available is canned bacon, roast beef and sausage.

Man Gets 5000 Volts

Paul Wuth, Jr., was electrocuted Sunday night at the P. G. & E. sub-station in Oakland, when 5000 volts passed through his body.

Wuth was oiling a dynamo, when in some manner it became short circuited.

Be a Producer.

The late rain preceded another installment of flower and garden which arrived from Washington, D.C. If you have a few feet of ground space, make it produce. The seeds are free.

While a number of cases of olive poisoning are reported throughout the country, none are mentioned where serious after-effects follow the fellow who eats an olive for a "chaser."

Big "C" Circus Given by U. C. Students Nets $9000

The Bis "C" Circus given by University students on the campus Monday night netted more than $9000 according to incomplete returns. The proceeds go to the student union fund.

The dance hall conducted in Harmon Gymnasium proved the big paying concession.

Ferry Slip Floats Away at Benicia

The big S. P. ferry slip at Benicia floated away Thursday and was picked up by tugs off the entrance to Vallejo harbor. Toredos had eaten away the piles.

El Cerrito Politics Becoming Feverish

EL CERRITO, March 5.—El Cerrito is not to go unnoticed as far as politics is concerned, and is trying to keep pace with her sister cities on either side of her. A recall petition bearing nearly 200 signatures against City Trustee Larsen has been filed. The charges against Larsen are "general incompetency."

The recall was filed by Curtis Johnson, who was recently ousted from the office of town marshal.

Cases Postponed

The car looters' cases, which were to have been heard in the federal court in San Francisco this morning have been postponed until 10 o'clock next Monday morning, pending the arrival of a new Federal judge in San Francisco.

Too Much "Wino;" Oaklanders Arrested

Mrs. J. C. Hirschman, Mr. and Mrs. C. Deschow, A. J. Kidd and C. E. Knipe, a motor party from Oakland, were arrested at Stockton while enaged in an argument. They were charged with violating the prohibition act, a bottle of wine having been found in their automobile.

Albany's City Clerk Resigns; Resumes Carpentering

George W. Nickerson, city clerk of Albany, tendered his resignation Monday night to the board of trustees, which was accepted by a unanimous vote of the board.

Henry Davis, deputy county assessor, was appointed to succeed Nickerson.

Nickerson is working at his trade, that of carpenter, in San Francisco, it is said.

The bonding companies for clerk and treasurer, respectively, have been notified by the board to make good the shortages, approximately $1600.

Rockefeller Gives to Educational Work

John D. Rockefeller has made appropriations amounting to three and a half millions, and the generous contribution has just leaked out. Rockefeller would rather not parade his generosity.

3 Highway Contracts Awarded by Co. Board

Three units of county highway construction work was awarded by Contra Costa county board of supervisors Monday. The following contractors were successful bidders:

Bay Point-Avon road, 3.28 miles. Contract awarded to G. W. Cushing: $65,557.95.

Franklin Canyon, O'Brien Bros., 8.48 miles, $178,892.50.

San Pablo Creek road, Bates & Borland, $130,784.40.

The board also accepted plans and specifications for Richmond-Giant highway, 2.75 miles.

Demurrers Filed in Two Damage Suits

A demurrer has been filed in the superior court by attorneys for the defendent in the case of Row vs. H. D. Mason and Leo Castro, all of Richmond. Row asks $20,000 damages for the loss of his little son, who was crushed to death when a Mason ice wagon driven by Castro backed over the little fellow, crushing him to death and also breaking the legs of another little tot of the Rows.

A demurrer has also been filed in the A. J. Meindersee vs. Pullman Water Co., wherein $3000 damages is asked for injuries sustained by Mrs. Grace Meindersee from falling into one of the company's ditches.

WHAT COULD SHE DO?

He—It's reported that we are engaged.

She—Well, it's not my fault that it is only a report.—London Answers.

RADIUM ECONOMY.

The use of radium on a large scale therapeutically involves danger of loss, and this factor has been a big one in inducing hospitals and clinics with a gram or more of the element in use to utilize radium emanation instead of applicators containing the radium itself. There has been installed in a Pittsburgh laboratory an elegant and useful apparatus for the collection, purification and tubing of radium emanation, obtained from a salt of the element. It differs from earlier apparatus in that liquid air is replaced by chemical means of purifying the emanation, which is felt to be more reliable.

"MOVIES" IN SIAM.

There are at present nine film theaters in operation at Bangkok, Siam, and another building which will house a large movie theater is now under construction. This structure will cost about 200,000 ticals, and another 100,000 will be spent on its furnishings. When completed it will have a seating capacity of about 5,000.

VERY MUCH SO.

"Tom is going to give his wife a silk and silver-handled umbrella."

"He must have made up his mind to open up."

Governor Had a Heart For College Girl Speedster

Governor Stephens saved the day for Miss Lucille Krause, pretty Berkeley college girl, who was pinched and jailed in Oakland for speeding. Governor Stephens interceded in behalf of Lucille, his action being based on the fact that it is unduly harsh to send young girls to jail.

Miss Krause is an university sophomore and the daughter of a Fullerton banker.

Attendance 1382 At Berkeley High

Berkeley as an educational center claims leadership in schools and colleges, and announces that her $800,000 high school will just about meet the demand. The semi-annual apportion of state school funds for the high school was $6837 94, based on an average daily attendance of 1382 pupils.

It looks like the movie artists do actually have a real feelin' for one another other than pretending, as in the case of Doug. and Mary.

STRING FROM MILK WEEDS

Something Worth Remembering on the Next Camping Expedition You May Take.

"Take the stalk of any of the common milkweeds and break it, and you will find that the outer bark does not break and may be stripped off into silkenlike threads, which can be twisted together and used as thread with which to sew ditty bags, knife scabbards, etc," says Dan Beard, boy scout chief, in his department in Boys' Life.

"No one showed the chief how to use the milkweed; that is, no human being showed him, but there is a little orange and black wooderafter who builds its nest of string and yarn, when he can find it, in the shade trees of the village streets, but in the wilderness, like the rest of us, he must use material he finds in the woods, and it is there that the chief discovered that the Baltimore oriole was using milkweed fibers with which to build its hanging nest.

"The chief also discovered that the vireo was using the inner bark of the chestnut with which to make its cup-shaped nest, and the chief immediately began to experiment with the inner bark of the chestnut, and with it he made a rope the size of an ordinary clothesline, which could support him without danger of breaking, and ever since then he has used this bark for string or rope wherever chestnut trees were handy.

"Not only are these things good with which to sew and with which to do up bundles, as was pointed out to you readers in the chief's story of the 'Rest Cure,' but one may also use them for ropes with which to bind together the logs of a raft, for a boat or a canoe, or as material with which to braid a belt, or as fiber to be used as raffia in basket making."

SAME FEELING.

"Have you ever taken a tail spin in an airplane?"

"No, but I have been called upon unexpectedly to make a speech, and I guess the sensation is about the same."—Detroit Free Press.

THEIR SORT.

"Owing to the lack of prisoners from drink cells in some prisons are being let out as apartments. Is not that enough to electrify one?"

"Humph! Then I suppose they are the dry cells."

HER REVENGE.

"How did you ever come to marry him?"

"He was always bragging that no woman could henpeck him, and I just had to show him."—Tenshun 21.

Some Believe the Big Rainstorm Result of Prayer

The recent rainstorm came in the nick o' time and, whether it was Hatfield or the prayerful supplications of the Mills College girls, we received a good soaking and the farmers are happy. An average of an inch or more fell in the central portion of the state, which makes a fraction less that six inches for the season.

"His Highness," New School Paper

That is not quite the name, but will do in a pinch. The paper is published twice a month and carries the name "Hi-Nus" at its masthead, meaning "High-News," in abreviated or amputated form.

The paper is a 3-col. quarto, and will be exempt from curtailment in the extravagant use of white newsprint.

The Hi-Nus has a staff of ten editors and three reporters (just think of the payroll), and believe us there is some "hot stuff" in the Hi-Nus which causes us old hard-boiled space writers to sit up and take notice. Long live the Hi-Nus, and the boys and girls of Richmond high school.

Peace on Yearth

I ain't a-feeling haf so scared
As what I was six months ago
When bolshevikis up an' rared
An' swore to hell we'd shorely go.

The air is sweeter now, it seems,
An' hatred kind o' dyin' down,
So I can sleep without no dreams
Of shot-up men in my home town.

When banker, butcher, lawyer clerk,
Employer an' the hired man,
Jest hump theirselves in honest work
There ain't no hitch seams in our plan.

So now its lookin' that-a-way,
I've iled my gun an' hung it up;
An' evry man I meet today
I wriggle like a friendly pup.

—Old Timer.

SAVING MISS LIBERTY'S FACE

Government May Find Itself Forced to Sell Silver Currency in the World's Market.

The silver dollar has become precious again. As recently as 1915, the real value, expressed in the market price of the silver it contains, was 10 cents. Recently, it has come pretty close to the dollar mark. When silver sells at $1.2929, the dollar is really at par with the market. Our dimes, quarters and half dollars contain still less silver proportionately to face value. Silver will have to go to $1.3823 an ounce, before their contents are worth on the market as much as their face.

If the price of silver rises beyond the face value of coins, the coins are melted and the populace has to resort to postage stamps or other makeshifts. England has found the market price of silver getting so near the point where it will be profitable for people to melt down its coins that it has placed an embargo upon exports of silver. If the treasury sees danger that our dimes and quarters will disappear over night, using the law under which it melted down some millions of silver dollars and shipped the bullion to India during the war, it may sell silver in the market to keep the price down. —The Nation's Business.

ONE ENDING.

"Prohibition has put a stop to partial ocean voyages."

"What do you mean?"

"People now will have no chance to get half seas over."

Democrats Favor Wet Plank in Platform

Nine Dollars Is Daily Wage Asked by Carpenters

At Tuesday's conference of the bay district carpenters' association and the bay district building exchange, a wage increase of $1 a day was a agreed upon. This will bring the daily wage of union carpenters to $9.

Near East Drive Delayed For Week

The drive to raise $12,000 in Richmond for the Near East relief fund is being temporarily delayed by the illness of Mayor James N. Long, who is at the head of the movement.

It is expected that the work of committees will begin next week and the drive be actively pushed.

Colorado Springs Elks Give Printers Class Entertainment

The Elks minstrels of Colorado Springs recently gave a complimentary entertainment to the residents of the Printers Home and invited guests, the large theater in connection with the Home being crowded. The Elks, 40 in number, all finished musicians and stage artists, were directed by Prof. Louis Fink, and have all had professional training behind the footlights. After the show an elaborate banquet was served as a fitting expression of everybody connected with the magnificent home founded by the printers of the United States and Canada, many of whom are B. P. O. E.'s.—Colorado Springs Gazette.

Richmond Lodge of Elks Elect Officers

Richmond Lodge B. P. O. E. No. 1251, held the annual election of officers Tuesday night with the following result:

Exalted Ruler—George B. Fredenburg.
Leading Knight—Ira R. Vaughn.
Loyal Knight—W. R. Selby.
Lecturing Knight—Harry Jones.
Secretary—C. F. Annett.
Treasurer—W. L. Ballenger.
Trustee—L. H. Transue.
Tyler—Peter Brown.

The above staff of officers is said to be one of the strongest "batterteries" the lodge has elected since its organization, and the membership of 1251 will no doubt go over the top and pass the 1000 mark during the year 1920.

Retiring Exalted Ruler Hiram Jacobs will be given an ovation at the meeting of March 30, which will be a big initiation night.

Layton Secured Fine Location

J. W. Layton has secured one of the best apartment and rooming houses in Richmond at 9th and Macdonald, over and in the rear of Kurtz' clothing store. The entrance to the building is on 9th, three fine store-rooms fronting on this street, one of the lines of business a first-class restaurant, which makes the Casa del Rey a convenient place to reside.

Mr. Layton has leased both floors of the hotel, bought the furnishings and is now Landlord Layton and in full control.

Wet and Dry Forces to Fight It Out in Convention

There will be a hot fight at the National Democratic convention in San Francisco when the clans gather there in June.

Already the democrats have shied the "wet" castor in the ring, and the national campaign is crystalizing in such definite form that politicians at the national seat of government at Washington believe the liquor fight will be carried to the polls in November.

The fight will be made upon the issue of beer and light wines (principally beer) against dryness.

"Wet" activities are intensified by the hundreds of petitions pouring into Washington.

Governor Edwards of New Jersey is coming to the convention to fight for a wet plank.

It is stated that William G. McAdoo may seek the nomination for president as a "four per cent wet" candidate.

But with all the boosters on deck to make it wet again, William Jennings Bryan will be on hand prepared to fight the wet forces to the bitter end.

And then, again, the republicans may insert a beer plank in the national platform.

Which means that the coming campaign will have things "stirring" to the limit this fall.

President's First Motor Ride Since His Illness

President Wilson went motor riding Wednesday, the first time he has been out since his western tour last October. The president was accompanied by Mrs. Wilson and Dr. Grayson. Secrecy was observed at the White House concerning the trip, which lasted one hour and twenty minutes.

Rent Boosters Have the Profiteering Bug

The Macdonald avenue rent-booster has caught the profiteering fever, and there is no telling when or where it will stop.

The excuse for this sudden wave of jumping up rents, a landlord explains, is that taxes have raised 100 per cent in the past year, which must be met.

This kind of "bunk" don't take with the one-man store or shop, of which Richmond has a large majority, caused by the excessive duplication of all lines of business.

The advanced rentals between 4th and 5th streets of nearly 100 per cent will have a tendency, say tenants, to make a number of store-rooms empty, which is not a healthful business sign for a working-man's town under present abnormal conditions.

Bank Clearances

The following are the bank clearances for January, 1920:

San Francisco	$721,476,045
Los Angeles	316,283,000
Oakland	45,129,035
San Jose	25,314,788
Sacramento	27,828,326
Fresno	23,541,733
Stockton	27,054,500
Berkeley	14,385,383
San Diego	12,660,665

THE TERMINAL, oldest newspaper in Richmond.

BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

SCOUT COURT ENDS QUARREL

Scouts Philip Grzywa, 12 years old, and Ray Moon, 14, living next door to Philip, in Omaha, Neb., had a quarrel and each vowed to "get even" at the first opportunity.

The quarrel developed into a fight in which one of the boys was pretty badly hurt before friends separated them.

"No good scout will hold a grudge against another," said Patrol Leader Roy Fredlund, 14 years old.

With the formality of a regular court of justice a Boy Scout court was called.

Following the hearing, which lasted an hour, the "jury" reported a "verdict" as follows:

"We find that both boys are to blame for the trouble.

"Each is sentenced to do the other two good turns every week for four weeks.

"The boy who quits the troop because of the trouble, or who fails to do the good turns, will be considered the most guilty."

The verdict read, Philip and Ray sprang from their seats and shook hands, agreeing to forget their past differences and be "pals" again. They left the meeting arm in arm amidst the cheering of their fellow scout members.

ALL COMFORTS OF HOME.

In the Woods Ready Invention Supplies Most of Our Customary Appliances.

ALL WOULD BE BOYS AGAIN.

Dan Beard at a recent scout rally in Scranton told the boys that they must not be afraid or overawed by "the bunch of clergymen, dignified judges and confidentially that there is not a man in the crowd who would not be willing to change places with the greenest tenderfoot among the scouts present."

This remark seemed to hit both the boys and men very favorably, and Robert L. Graham was moved to send these lines to the scout commissioner:

I'd like to hit the good old trails,
And tramp the woods near home till sore.
I'd like to be with old-time pals,
I'd like to be a boy once more.

I hear the bugle calling,
It's calling me back again—
Back to the land of "Yesterday."
To the camp of "What-has-been."

I think I see the bugler,
His name is "Memory,"
And he's calling for this "good scout"
To come back and happy be.

SCOUT OATH GAVE MOST HELP.

A Boston paper offered a prize for the paragraph that had given the greatest inspiration and help. Lines from Tennyson and others were sent in by the hundred. The letter that gained the prize was as follows:

I am only a boy, and boys' opinions are not respected by most grown-ups, but we have them just the same.

The paragraph which helps me the most is the Boy Scout oath, as follows:

On my honor, I will do my best:

1. To do my duty to God and my country, and to obey the scout law.
2. To help other people at all times.
3. To keep myself physically strong, mentally awake and morally straight.

Good Site

"Why not combine the suggestions for dessert?"

"How so?"

"Put on the table a cottage pudding on a floating island."—Baltimore American.

Indefinite

She—Always the same answer when I want to do a little shopping! How long do you expect to be without money to give me?

He—As long as I'm short.—Baltimore American.

PREACHERS STOP PLAN TO AID DISABLED "VETS"

Elks Forbidden to Show Picture on Sunday

Knoxville, Tenn.—Because the ministers of this city view it as a "proposed violation of God's holy day," the Knoxville Elks' lodge were forbidden to show a moving picture here on Sunday for the benefit of disabled soldiers.

Convinced that every cent taken at the exihibition would go to the relief of soldiers torn by war, the Knoxville Ministers' Association nevertheless protested to the city commissioners.

The commissioners instructed the chief of police to arrest the Elks' committee if the picture was shown in violation of the "blue law" of 1803 that forbids "any kind of show, feat, circus or theatrical performance or play of any kind in public places for amusement, gain or profit," on Sunday.

"The law is the law and right is right," said the clergymen. The picture was available only on Sunday.

London.—Ignace Jan Paderewski, former Polish Premier, will never again appear on the concert platform, nor is he likely to re-enter politics, according to the Vevey, Switzerland, correspondent of the Daily Mail. During an interview with M. Paderewski, the correspondent asked him if it was true he would accept the nomination as President of Poland.

"I don't think I shall be invited to become President," the great pianist replied. "I hope to devote the rest of my life to composing music. I am convinced an era of peace and prosperity for Poland is begun and feel my political mission is finished."

GIRL NAMES OAKLANDER AS HER CHILD'S FATHER

Typist Given Guardianship of Baby; Will Sue G. D. Abbott, Jr.

San Francisco.—According to Granville D. Abbott Jr., son of Granville Abbott, retired capitalist and mining man of Oakland, of being the father of her seven-months-old child, Miss Vera L. Donnellan, a stenographer of this city, February 26 was granted legal guardianship of the child by Superior Judge Thomas F. Graham.

In the petition the child is named Granville D. Abbott, Third. The mother obtained guardianship, she said, for the purpose of bringing civil suit against Abbott under the statute by which a father is required to support his illegitimate child.

Miss Donnellan is represented by Attorneys Phillip I. Manson and Thomas A. Allan.

FOOD AMENDMENT UNCONSTITUTIONAL, COURT RULES

St. Louis.—The amendment to the Lever food control act was declared unconstitutional by United States District Judge Faris here February 26, when he sustained a demurrer of the defense and dismissed the case of the L. Cohen Grocery Company, which was charged with making an unjust profit on sugar. The company was accused of charging a wholesale price of 19.8 cents a pound for sugar sold last November.

The Court held that the amendment to the Lever food control act violated the Sixth Amendment to the Constitution, which requires that all citizens shall be informed of charges against them.

Judge Faris took up the conflict with the Sixth Amendment, saying the Lever act amendment was vague, indefinite and uncertain, and delegates legislative powers to courts and juries, and that it did not provide for informing defendants of the charges against them.

INNOCENT MAN STATE "HANGED" VOTED $5000

Jackson, Miss.—The lower house of the State Legislature voted $5000 to Will Purvis, a Lamar county farmer, for having twice faced the gallows only to be ultimately exonerated of the charge that he murdered Will Buckeley, witness in a white-capping case, twenty-six years ago. On the day for execution the noose slipped and Purvis fell through the trap, unhurt. His counsel won a contention that he could not twice be punished for the same offense and sentence was commuted to life imprisonment. Two years later Joe Beard, another farmer, cleared Purvis in a deathbed confession and Purvis was pardoned.

Marine Names Baby "Miss Marine"

San Francisco, Feb. 28.—Sergeant Oran B. Haverly, United States Marine Corps, and Mrs. Haverly announce the birth of a daughter who will be christened "Marine Cora Haverly."

In requesting a furlough and announcing the birth of the child to his commanding officer the Marine used the Biblical quotation, "Train up a child in the way he should go: and when he is old he will not depart from it."

Sergeant Haverly explained that he wanted a boy, but as he could not hope ever to enlist his child in the Corps, he had done the best he could to make a good Marine of her.

He got his furlough.

BOY ON SKATES KILLED BY TRUCK

Play Has Fatal Ending Under Wheels of Heavy Vehicle

San Francisco. — Twelve-year-old Sylvan Falk of 461 Central avenue was killed instantly February 26 when he fell beneath the wheels of a heavy motor truck while roller skating at Oak and Scott streets.

Henry G. Pengel of 1532 Florida street, the driver of the truck, was arrested by Policeman C. A. Burns and charged with manslaughter.

The boy and a companion, Dudley Manier of 1731 Hayes street, were on skates and, according to the Manier boy, his companion accidentally sped off the sidewalk and collided with the side of the truck.

He hung on for a moment, according to young Manier, then lost his hold and was crushed beneath the rear wheel. He was pronounced dead on arrival at the Park Emergency Hospital.

He was the son of Henry Falk, a salesman, and Mrs. Rose Falk, bookkeeper for the National Coal Company.

The mother and father had not yet arrived at their home, and some time was lost in finding them. The mother became delirious in her grief and was taken to the Central Emergency Hospital, and the father also suffered a collapse.

The Manier lad stated that the driver of the machine was in no wise to blame.

The lad was an enthusiastic member of the Boy Scouts and was on his way to a Scout meeting at the Columbia Park gymnasium. He was also a member of the Columbia Park Boys' Band. A brother, David, two years older, is also a member of the band, which is now touring the Orient and Australasia.

NERVOUS BURGLAR FLEES FROM VICTIM

Berkeley.—A nervous burglar accosted Harry Snedigar, 1842 University avenue, February 26, near the corner of San Pablo avenue and Acton street, but became too frightened to rob his victim. "Hold up your hands," called the burglar as Snedigar approached. Snedigar says the man shook so from fright that he could hardly talk. Snedigar started to unbutton his overcoat to get his watch for the man when the robber turned and fled through a vacant lot.

PIPE LINE TO CARRY OIL FROM TEXAS TO CHICAGO

Chicago.—A pipe line to carry oil from the Kansas, Oklahoma and Northern Texas fields to Chicago, with a distributing center at St. Louis, will be constructed and in operation in the next twelve months, two petroleum journals announced here. An organization composed of independent oil dealers will construct the line at a cost of $25,000,000, according to the announcement. The pipe line, it was said, would be the longest carrier of refined oils in the world.

EIGHT-INCH SAPPHIRE IS DISCOVERED

Bombay, India.—A sapphire eight inches long and weighing more than five pounds is reported to have been found at Mogok by a Burmese. Its value is estimated at more than $175,000.

TWINS SCORED FIFTH TIME IN TEN YEARS

Jersey City, N. J.—Mrs. Richard Doherty of the Court of Common Pleas in Jersey City, February 26, gave birth to twins for the fifth time in their married life of ten years. The youngsters and the mother are doing well. The family now includes six girls and boys, two children having died.

STEWART FREED ON CHARGE OF MURDER

Oakland.—William F. Stewart, Emeryville jockey, was acquitted by a jury in Superior Judge St. Sure's department on a charge of murdering his wife, Mrs. Mary F. Stewart. The jury was out six hours.

The jury stood seven to five for acquittal at 11 o'clock and reported they were unable to agree. Judge St. Sure ordered them locked up for the night. Five minutes later the jury sent word they had reached a verdict.

Stewart was acquitted on the ground that he was insane at the time of the slaying, September 18, 1919, when he shot his wife while she was walking in the streets of Emeryville with another man.

PADEREWSKI QUITS PIANO AND POLITICS

Geneva.—Ignace Jan Paderewski, former Polish Premier, who arrived recently in Switzerland, has gone to London for the purpose of laying before the supreme allied council Polish views concerning peace negotiations with the Russian Soviet Government.

MISSING MARIN COUNTY MAN FOUND MURDERED

Body Concealed in Brush near Ignacio; Employer Arrested

San Francisco.—The body of a man, whose skull had been crushed with an axe and whose left arm had been severed was discovered February 26 in a clump of bushes on the ranch of Peter Filippini, three miles west of Ignacio, Marin county.

An attempt had been made, according to Sheriff J. J. Keating, to destroy the body with lime. The murder occurred late last December, according to the authorities.

The body is believed to be that of Dominick Marsell, who, up to Christmas day, was employed by Joe Rossi, a charcoal burner, who lives about a half a mile from where the body was found.

Rossi was taken into custody and is being held pending an investigation.

Marsell was discharged by Rossi, December 24 last, and the body found on the Filippini ranch answers the general description of the missing laborer.

Rossi was taken to the scene by Sheriff Keating. He asserted his innocence when taxed with the crime.

MOTHER ESTRANGED FROM DAUGHTER

Mother Pleads in Court for Photo When Lass Was a Baby

San Francisco.—Tears and hard words mingled in a legal battle between mother and daughter over a baby's photograph in the court of Justice of the Peace Thomas F. Prendergast. The photograph was that of Miss Evelyn Willis, 2230 Fifteenth street, who sued her mother, Mrs. Gussie Willis, 230-B Lexington avenue, to obtain clothing and personal effects the mother refused to give her because she went to the home of an aunt to live after the mother objected to her sweetheart, a returned soldier.

With her sweetheart and a policeman Miss Willis, who is eighteen years old, went to the home of her mother and demanded her personal property. The mother refused to give up anything and commanded the girl to return to her. The daughter then filed an attachment suit and a deputy sheriff took charge of the disputed articles.

When Judge Prendergast decided that the daughter should have the disputed property, the mother wept and begged for a photograph of the girl taken when she was a baby. Judge Prendergast ordered it delivered to the mother. "A baby's picture always belongs to its mother," he said, "and it has a value that cannot be measured in money."

When the daughter persisted in her claim to the photograph the Judge, with Solomon-like wisdom, ordered a copy made for the daughter and the original delivered to the mother.

ATTENTION TO DISK HARROW

Implement Should Be Gone Over Carefully During Winter Months and Put in Order.

(By L. B. BASSETT, University Farm St. Paul, Minn.)

The disk harrow is a tillage tool found on nearly every farm. Its useful life is about 20 years, as shown by carefully compiled statistics. Thus it is a long-lived tool. There is very little about a disk to wear out. It has few moving parts and, if given good care, should cause little bother.

Disks should be gone over carefully every season. During the winter months the boxes should be taken apart, carefully cleaned and, if badly worn, replaced. See to it that the oiling system works and that the bearings are getting oil. Keep the arbor bolt tight. This holds the disk firmly in place.

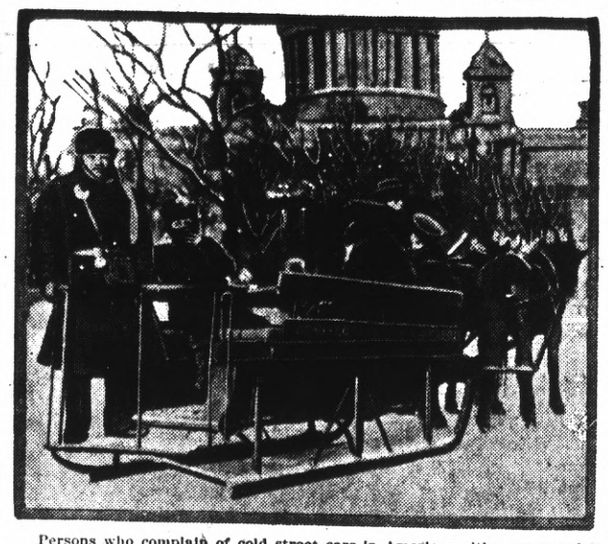
If the disk is used much it should be sharpened at least once each season. This greatly increases the penetration and decreases the draft, as it will do more work with less set. It will also do better work; and because it does not need so much angle or set, there is less strain and wear on the boxes. While a dull disk will cut, it is like a dull ax, inefficient and expensive to work with.

FEEDING SKIM MILK TO PIGS

Resume of Many Tests Made for Purpose of Ascertaining Most Economical Method.

A good many tests have been made for the purpose of ascertaining the most economical way of feeding skim milk to hogs. A resume of the work done along this line at the Indiana, New York, Iowa, Wisconsin and Ontario experiment stations shows that young pigs, that is, pigs weighing less than 100 pounds, may be fed as much as three pounds of skim milk per pound of grain, and by grain we mean any one of the cereals fed singly, or a number of them together. As pigs grow older the amount of skim milk should be reduced to about two pounds per pound of grain. The reason for this is that less protein is required as the pigs grow older and still less is required during the fattening period.

WINTER TRANSPORTATION IN PETROGRAD



Persons who complain of cold street cars in American cities are urged to study this photograph of urban transportation in Petrograd in winter time.

SEA TREASURE LURE TO DIVERS

Ingenious Mechanisms Devised to Recover Some of Wrecks Beneath Waves.

ARMORED SUIT IS DESCRIBED

Inventor Explains Device Which Enables Him to Work Freely Under 7,000-Pound Pressure — Two Claim Deep-Sea Record.

New York.—Before the Germans sank a single vessel in the late war, it was estimated that there were strewn upon the floors of the Seven Seas, $7,000,000,000 worth of ships and cargoes, and records indicated that a large part of these were recoverable. Since the war the sum of the ocean's buried treasure is practically incalculable.

Naturally nations now vie with one another for the recovery of choice morsels of this treasure trove, and individual inventors are devoting genius and energy to the evolution of salving devices ranging in size from the one-man diving suit to complicated mechanisms so large that they dwarf the seagoing vessels of which they are integral parts.

Benjamin Franklin Leavitt of Brooklyn, inventor of a diving suit, who claims the deep-sea record, talked enthusiastically yesterday about what can be accomplished in recovering the shimmering treasures of gold and silver and precious stones with which old ocean's floor is carpeted.

Incidentally, Mr. Leavitt protests most emphatically against the assumption of world-record honors for any other diving armor than his own. He backs his protest in these statements:

"I not only hold the record for deep-sea diving, but for deep-sea salvage. I went down 361 feet in Grand Traverse Bay, Michigan, and remained down for 45 minutes the first time, and at another time nearly two hours. This is the world's record descent. Capt. John Morgan of the Morgan Transportation company, a cousin of the late J. P. Morgan, did the sounding. He took three soundings, using a wire sounder, and there is no possibility of error. Twenty-six persons witnessed the descent. This was in 1916.

Two Claim Deep-Sea Record.

"I see by some of the newspapers that a Mr. Turner claims the world record. The statement is made that Mr. Turner went down 360 feet 15 miles off Graves Light, Massachusetts. Look at this chart. Conceding that Turner went down and did everything he said he did, if you can find a 360-foot depth anywhere 15 miles off Graves Light I'll eat the map. Here's 49 fathoms—294 feet—the deepest water 15 miles off the light."

Coming now to the question of his diving suit, Mr. Leavitt said that its principal point of advantage is in the air-supply arrangement.

"My suit," said he, "is self-contained, carrying enough air for a four-hour submergence. The oxygen tank is connected with a reducing valve which reduces the pressure from 1,800 pounds to 2 pounds to the square inch, and, spraying through a nozzle, sucks nitrogen through a caustic soda cartridge. It mixes with the nitrogen and is discharged over the shoulder of the diver from a tube. The caustic soda absorbs the poisonous carbon dioxide and moisture. To protect the man from the caustic soda, I use an automatic valve that closes in three seconds after the water reaches it.

"The suit itself weighs 350 pounds and with me in it weighed just 500 pounds. The suit's buoyancy, however, counteracts 425 pounds of that, leaving a balance of 75 pounds that I bear on the bottom of the sea.

Mr. Leavitt regretted that he could not show the armor just as it was when he went down in Grand Traverse Bay, but he explained, he had made several important improvements since that descent.

"I learned a lot," he said; "in fact, I might say I learned more from my first 45 minutes actual experience down on the bottom, in my armor, than I learned from years of theorizing. Take the jointed strut rods down the sides of the legs and both sides of the arms, for instance. They were added after my descent."

Leavitt's Diving Armor.

Here he reassembled the armor to show how it worked. The legs and arms, which are very flexible, are made of hard-rolled copper tubing, guaranteed to stand 700 pounds of pressure to the square inch.

"These hinged strut rods down both sides of the arm," said Mr. Leavitt, "take the pressure from the wrist to the shoulder. The shoulder is a solid casting of manganese bronze and has a ball-bearing which allows the man within to move his arms, which would not be possible without ball or roller bearings." Here Mr. Leavitt whirled the arm around freely to illustrate his point. "At a submergence of 361 feet there is 6,664 pounds pressure here."

He called attention to the fact that the cable attached to the top of the helmet has a guaranteed lifting strength of 20,000 pounds. In the center of the cable is the telephone wire, connected directly with a small complete telephone in the top of the helmet. The diver is "connected" simply with dictaphone ear pieces. The helmet is also equipped with glasses which are triple and nonshatterable.

The top of Mr. Leavitt's desk boasts a miscellaneous assortment of ornaments. Here is a piece of hardwood brought up from a wreck. The wood had been 52 years beneath Lake Huron, Mich., but shows no ill effect from its long submergence. Less pleasant, if more interesting, is a strange old black shoe with wide square toe.

"A piece of the foot of the girl who had been wearing it slipped out of the shoe after we'd had it here a while," said Mr. Leavitt.

Salving a Copper Cargo.

He wears a strange old ring fished up during his salvaging operations. This was found in connection with the 350 tons of copper which went down in the Pewabic in Lake Huron, in 1865. The copper was salvaged from a depth of 180 feet. Mr. Leavitt says other salvagers had tried to get it and failed, and no less than seven divers in rubber suits had lost their lives in vain attempts.

"It is not possible to do salvaging work in winter, except in southern waters. Winter is the off season," said Mr. Leavitt. "But next summer, along about June, we propose to go after the Merida, which went down 52 miles off Cape Charles. She was carrying $1,800,000 in silver bars alone. Silver then was worth only about 49 cents an ounce, and it has gone up a lot since. Besides that, there is $100,000 in money in the safe in the purser's office."

It was pointed out by Mr. Leavitt that £1,000,000 sterling had already been recovered by British government divers from the White Star Dominion liner Laurentic, which was sunk in 1917 off Fasad Light.

When questioned about the possibility of getting good divers, Mr. Leavitt replied:

"Good men are scarce, as you know, for diving or anything else. Still, you can usually get a man, and, if you direct him, he can do almost anything. But usually, if thrown on his own resources, he will be almost helpless."

When asked about the possibility of getting the cargo lost when the torpedoed Lusitania went down, Mr. Leavitt said it should certainly be possible.

"In my armor, I can, if necessary, descend 1,000 feet," he said. "The Lusitania is in 285 feet of water. As to the value of salvage, there is $2,500,000 gold in her and $5,000,000 worth of imperishable freight, such as copper, brass, iron, etc. There are also $5,000,000 worth of negotiable securities, quite apart from the valuables, jewelry and cash of passengers.

"The Arabic, lying about sixty miles from the Lusitania, has $5,000,000 gold in her. She is in about 315 feet of water."

Mr. Leavitt said that the position of these ships would not change perceptibly, as there was at most, a four-knot current at such depths.

HOLLAND HIT HARD BY WAR

Impression She Was Enriched by It Dispelled by Figures.

COST COUNTRY $477,787,000

All of Her Industries Suffered, and Much Was Sunk in Certain Foreign Bonds—Suffered Most of Any Neutral.

New York.—Impressions that Holland became enriched by the war are combated in a pamphlet issued by D. J. Steyn Parve, acting consul general for the Netherlands, showing that, by reason of its geographical and economic position, the pressure and evil effects of the war were probably more seriously felt there than in any other neutral country.

On the mainland, the pamphlet says, Holland was entirely surrounded by territory in the hands of one of the belligerents, while the North sea, more than any other waterway, was part of the war zone. As the prosperity of Holland depends upon international intercourse, industries were choked, large outlays were imposed in the maintenance of a defensive army, there was growing unemployment and the people generally suffered.

Shipping Shrinks.

In 1913 shipping in the ports of Holland amounted to 36,229,000 net tons. That volume shrank to 3,363,000 tons in 1918. Traffic in Amsterdam decreased from 2,597 ships in 1913 to 378 in 1918, and in Rotterdam from 11,285 to 1,181 ships. Rhine tonnage dropped from 1,168,614 in 1913 to 490,732 in 1918. Dutch foreign trade became entirely disorganized, owing to restrictions enforced by both belligerents.

Import duties in 1913 amounted to $5,447,040. In 1918 they were about $3,000,000, and domestic trade suffered by the reduction. Individuals made excess profits here and there, producing a crop of the newly-rich, but they thrived at the cost of an impoverished country; and against these profits should be reckoned the loss of 247,348 tons of shipping, representing 22.38 per cent of the fleet of 1913.

Large profits came from agriculture, in clay soil, in the first years of the war. Sandy soil could not be cultivated, owing to lack of fertilizers, and the requisitioning of rye, formerly used as fodder, caused serious reduction in the number of cattle. It was necessary to kill off the smaller species of live stock in order to save food for the more valuable species. War conditions proved favorable to the fisheries in certain periods. At other times that industry was doomed to practical inactivity. As many as 135 fishing boats were sunk and many fishermen perished.

Dutch holdings of foreign securities were affected. In 1918 the nominal worth of Russian bonds held in Holland amounted to $364,120,000, and additional Netherland interest in Russia represented a value of $52,800,000, all of which may be considered lost. Losses on securities of central Europe, especially in Hungary, were very large.

Owing to the limitation of imports by the allied governments, many of the Dutch industries could work only under heavily restricted capacity. It was extremely difficult to obtain raw materials, coal, oils and other articles essential to the industries, which had to shut down for varying periods, dismissing their employees.

The Royal National Committee of Assistance paid out $22,423,360 from August, 1914, to December, 1918, toward the support of persons made indigent by the war. In the same period the government allocated $107,200,000 toward expenses of the food supply and $27,840,000 to assist the needy and to combat unemployment.

Cannot Be Expressed in Figures.

Disadvantages connected with keeping under arms all the able-bodied part of the male population for four years, taking many of them from their studies or their regular productive work, cannot be expressed in figures. The most important single item was that of the cost of mobilization, which amounted, at the end of 1918, to $330,560,000, bringing the government expenses, due to the war, to a total of $411,787,006.

Nearly $160,000,000 was raised by direct taxes and $352,000,000 was obtained by loans. Additional extraordinary expenses have already absorbed $27,520,000, and the debt must inevitably be increased to pay off the original loans in from twenty to twenty-five years. As a consequence taxes per capita must be raised to about $23.48 annually, an increase of 158 per cent compared with 1913.

CALOMEL MAKES YOU SICK. UGH!

"Dodson's Liver Tone" better than calomel and can not salivate.

Calomel loses you a day! You know what calomel is. It's mercury; quick silver. Calomel is dangerous. It crashes into sour bile like dynamite cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish constipated and all knocked out and believe you need a dose of dangerous calomel, just remember that your druggist sells for a few cents a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and can not salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.—Adv.

Hewitt—How do you and your wife get along together? Jewett—First rate, considering that our automobiles are not of the same make.—Houston Post.

"Diamond Dye" Old Clothes

See faded, shabby dresses, coats skirts, sweaters, blouses, gloves feathers, draperies, everything turn new.—Adv.

The Remedy

He—We will have to call another meeting of the club because last night we found we had no quorum.

She—Then why don't you buy one and keep it where you can get at it handy when you need it?—Baltimore American.

MURINE FOR YOUR EYES use Murine often. At all Druggists. Write for Free Eye Book. **Murine Eye Remedy Company, Chicago, U. S. A.** Rests, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tire, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, Safe for Infant or Adult.

"What did I die of?" "I don't know." "Iodide of potassium."—New York World.

ALLEN'S FOOT-EASE FOR THE TROOPS.
Shaken into the shoes and sprinkled in the footbath, it gives rest and comfort, takes the friction from the shoe and prevents blisters and sore spots. Makes walking easy. Accept no substitutes. Sold everywhere, 25c—Adv.

Natural Affinity

"Jim was telling me the first time he went to the front he was hit by a shell. I knew that would happen."

"How did you know it?"

"By the law of natural selection. Jim is such a nut."—Baltimore American.

Cuticura Soap for the Complexion.
Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum and you have the Cuticura Toilet Trio.—Adv.

Naturally

"Are you going to enjoy yourself at the movies?"

"Well, we do expect to have a reel good time."—Baltimore American.

NAME "BAYER" MEANS ASPIRIN IS GENUINE

For Toothache, Neuralgia, Pain, Colds, Headache!

You want relief—quickly and safely! Then insist on "Bayer Tablets of Aspirin," stamped with the "Bayer Cross."

The name "Bayer" means you are getting genuine Aspirin prescribed by physicians for over eighteen years, and proved safe by millions of people.

For a few cents you can get a handy tin box of genuine "Bayer Tablets of Aspirin," containing twelve tablets. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Dogs Talented in Comedy and They Provide Many Good Laughs for Owners

It is not generally known, but dogs are in many instances real comedians. Those who have made a close study of canines long ago came to this conclusion. The gift is not confined to any one breed. Some of the stunts done by fox terriers are not only laughable, but they show the dog to be a natural born comedian.

A woman recently owned a valuable fox terrier which was so much of a comedian that he kept the household in a state of constant good humor. The dog never had been taught the tricks he performed, and the most interesting part of it was, he liked to show off when the house was filled with guests. The terrier seemed to know that he was creating laughs. One thing he did was a trick that would be hard for the average person to believe unless he witnessed it. It was a performance he went through to avoid having his coat put on in the winter months, when a maid took him for a walk.

When the dog saw the maid approaching with the coat he would hang his head. One evening when a party of guests were present the dog conceived a new scheme of trying to arouse sympathy, so he could get out of having his coat put on. When the maid called to him he looked around the room, and then, quick as a flash, he started to run to the different corners as if looking for rats. He was as serious as a judge sitting on a bench. Once or twice he stopped to see what effect his performance was having, then he looked at the maid, wagging his tail with an expression on his face which seemed to say: "Now you won't make me put on the coat after that." The guests caught the idea, and a wave of hearty laughs came from all sides.

Mother's Cook Book

Thoughts are real forces—living messengers of power. Love thoughts, even when brought to bear upon our pains and trials, transform them and make them educational.—Henry Wood.

The Favorite Shell Fish.

The edible crustacea, as shrimp or prawns, crawfish, lobster and crabs, mussels, are classed under the heading of shell fish. Oysters, because of their flavor, are ranked as favorite food, but as for nourishment, they are not valued. At the price they have been this season in most markets, they are an expensive luxury, only to be used in case of illness or convalescence.

Oyster Cocktail.

Cut a grape fruit into halves, remove the fiber, leaving the sections unbroken as possible. Add six small oysters seasoned with salt and tabasco sauce.

Oyster Bouillon.

Wash and chop fifty good-sized oysters. Put them in a double boiler, cover and cook slowly for one hour. Add a pint of water, a tablespoonful of celery seed, strain, reheat. Add a tablespoonful of butter, salt to taste and serve in hot cups.

Oysters a la Martin.

Toast a round piece of bread and set on an earthen dish fitted with a glass bell. Spread the bread with anchovy paste. Above the paste set six or eight oysters, enough to cover the toast. Over the oysters dispose two tablespoonfuls of curry sauce; set the bell in place and turn a little curry sauce around the bell where it joins the dish. Let cook in the oven until the edges of the oysters curl.

Curry Sauce for Oysters, Martin.

Cook half a chopped onion in three tablespoonfuls of fat until softened and yellow. Add two tablespoonfuls of flour, one teaspoonful of curry powder, or more if liked, one-fourth teaspoonful each of salt and paprika, and stir until blended. Add a half cupful or more of oyster broth and enough rich milk to fill the cup, and stir until boiling. Add a teaspoonful of lemon juice, strain and it is ready to serve.

Escalloped Oysters.

Put a layer of oysters in the bottom of the baking dish, cover with buttered crumbs, season with salt and pepper and dot with butter. Add another layer of oysters and seasonings, then the crumbs. Pour over milk and bake twenty minutes. A cupful each of milk and crumbs is a good proportion. Never make three layers of oysters as the inner one will not be cooked or the outer layers over done.

Nellie Maxwell

Present Automobile Shortage Is Placed at 1,000,000 Cars

New York.—A shortage of automobiles this year was predicted by members of the National chamber of commerce, although they estimated that the passenger car output for the year would exceed 2,000,000. The shortage at present was placed at 1,000,000 cars. One of the most prominent manufacturers, it was said, is preparing to double the factory capacity this year because of the steadily increasing demand.

AFTER THE YEARS

Some little grace of tenderness and tears
After the years—
The cross I made me and the Midnight cares—
After the years.

They came, like Memory, of the Nevermore—
Love's grace at last I win;
How could I dream you stood there, at a door,
Saying: "Come in! Come in?

"Come in, from all the storm and stress of life—
Too far the wanderers roam,
The Sweetheart and the Mother and the Wife
Wait at the gates of Home!"

The other Home is still so far away—
Darkness and perils deep;
Do you, for me, make Winter seem as May—
Let Love kiss Life to sleep.
—Frank L. Stanton in Atlanta Constitution.

A WINTER EVENING

At night outside my window is a rush and whir of wings,
As if the trees and hedges and all insensate things
Were struggling in their slumber to reach the time that brings
The glamour and the wonder and the gladness of new springs.

The warmth and glow of night-time, with doors and windows tight,
In dressing gown and slippers, the old dog well in sight,
The favorite book, the fireside—oh, comfort and delight!
Indeed, what is more peaceful than a shut-in winter night.

And yet outside my window seems to come a whir of wings,
As if to stir my being with desire for other things—
With yearning for the promise that pulsing morrow brings,
The enchantment and the rapture, the fulfillment of new springs!
—Caroline Russel Bispham in New York Times.

"Now, boys," said the teacher in the juvenile Sunday School class, "our lesson today teaches us that if we are good while here on earth, when we die we will go to a place of everlasting bliss. But suppose we are bad, then what will become of us?" "We'll go to a place of everlasting blister," promptly answered the small boy at the pedal extremity of the class.

"Smith is very proud of his looks, isn't he?" said Brown. "Yes," agreed Jones. "He has more gold in his teeth than he has in the bank."—Knoxville Journal and Tribune.

"I don't know what we can make of Ethel," said the mother; "she sleeps so much." "I know, mamma," said Tommie, "Make a chaperon of her."—Yonkers Statesman.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

Ouch! ?! ?!! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called freezone when applied to a tender, aching corn or hardened callus stops soreness at once, and soon the corn or callus dries up and lifts right off without pain.

He says freezone dries immediately and never inflames or even irritates the surrounding skin. A small bottle of freezone will cost very little at any drug store, but will positively remove every hard or soft corn or callus from one's feet. Millions of American women will welcome this announcement since the inauguration of the high heels. If your druggist doesn't have freezone tell him to order a small bottle for you!—Adv.

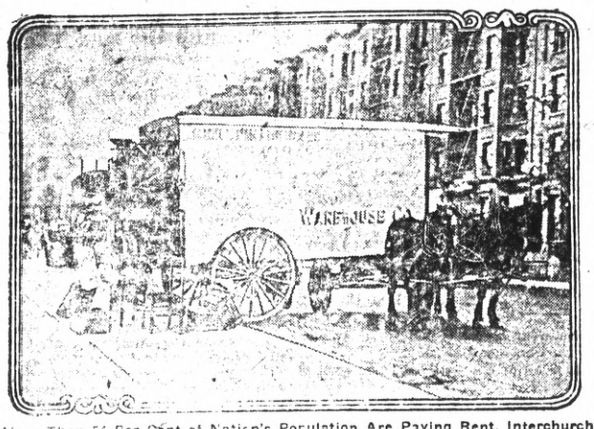
City Folks Becoming Wanderers Due to Increasing Cost of Homes



More Than 54 Per Cent of Nation's Population Are Paying Rent, Interchurch Survey Shows—New York City Leads Country, With 97 in Every 100 in Manhattan Giving Monthly Tribute to Landlord.

The housing problem in many American cities brings with it a church problem.

The high percentage of rented homes—58 per cent of all residences in New York, for example, and 97 per cent in the borough of Manhattan—means many indigent families. And investigation of the Interchurch World Movement shows that too often the family moving out of the territory of its church fails to transfer its membership to another congregation in the new neighborhood.

The church letter, like the family cat, is left behind. If the church had no more lives than a cat, say Interchurch workers, it would have been dead long ago, for just as the family "loses" its cat, so the church loses families.

The family church is becoming a rarity in the cities. One minister in a metropolis of 13 years noted 3000 changes in his congregation.

Through its city survey, designed to provide a program for closer cooperation between Protestant churches, the Interchurch Movement is seeking, among other things, to find means whereby migrant families shall not be lost to their respective denominations.

The present generation of the city, the survey reveals, is a generation of wanderers because of the growing number of rented homes and the rising rents. As a result, the family church is becoming an urban rarity. The family in which the father is a founder of the Church he attends, married to a member of the congregation, and with children baptized by the family minister, is more and more seldom found the survey workers report.

Too often the increase in rent has sent the family to another neighborhood. One purpose of the Interchurch World Movement survey of the cities is to determine how, through that efficient cooperation of churches which is the major aim of the movement, migrant families may not be lost to the membership of their respective denominations.

An Assured World Success.

"When such a vast multitude of people come together earnestly and prayerfully, there must be developed an outpouring of spiritual power such as this land has never before known. If the Interchurch World Movement is complete in its co-operation, if the individual constituents are consecrated and in earnest, and the leadership is able, there is no limit under God in what may be accomplished in the establishment of His Kingdom on earth."—John D. Rockefeller, Jr.

"'Keep together! Keep together!' shouted a commanding officer overseas. 'No man alone can take a trench!' I say: Keep together! Keep together, men of God! No church alone can take a world!'"—G. Sherwood Eddy.

CO-OPERATION THAT HELPS

Bethlehem steel shipyards will supply employes at cost with groceries. That helps.

Two big insurance companies, the Great American of New York and The Phoenix of Hartford, have renewed the life insurance for their various employes for another year. That helps.

Life insurance under this group plan is quite a considerable addition to the remuneration received by employes.

The companies named are among the pioneers in this connection which has since been taken up by several other insurance organizations.

Insurance is such a good investment that large mercantile concerns are carrying policies for their employes.

Railroad employes in many big operating centers are putting in co-operative stores to reduce the high cost of merchandise. That helps.

That beats striking and using the political club to get special class legislation.

It is also up to the heads of great financial and industrial organizations to help the program of social readjustment.

PLUTOCRATIC TAX REFORMERS

The New York Tax Reform League comes to the front with the simple proposition to do away with all personal property taxes.

This delightful suggestion is only another way of stating the Single Land Tax proposition.

It would be the first big step toward leaving nothing on the tax rolls but land and land taxes would double.

Why not do away with all assessors and local tax collecting and have nothing but the income tax?

The plutocratic New York tax reformers would be the first to cry out against the extension of their program.

Is it any more right to exempt all taxes on personal property than to exempt all taxes on land property?

It would be more just to collect a poll-tax on all citizens who do not appear on the taxrolls.

Every advocate of the Single Tax will agree with the plutocratic proposition originated in New York.

There is is some "silent speculation" in regard to a successor of the late Assemblyman W. E. Calahan? Who is going to represent Contra Costa county at the state capital? Among those who have not previously been mentioned, is Richmond's well known townsman, W. T. Helms. No one could fill this position better, as Mr. Helms is eminently qualified and well liked by all Contra Costans who know him.

It is remarkable how the "wise guys" increase in number about election time as to the conducting of campaigns, newspapers, etc. Any one can figure such little things out and not half try—if they have the coin.

Mrs. Safetyfirst says that she and her children never indulge in mushrooms until the day after her husband has tried them. If he survives, then she is willing for remainder of the family to take a chance. The dog, in this case, is more valuabe than the husband.

Fishing tackle is beginning to receive attention.

THIS THE MOMENT OF MOMENTS TO GAIN SPIRITUAL UNITY

By DR. JOHN R. MOTT.

DR. JOHN R. MOTT,
Chairman Executive Committee Interchurch World Movement.

This is the moment of moments for us to find our unity, our spiritual solidarity, without sacrificing our diversity and that which is most distinctive to each of our communions and which, by the way, is the choicest possession we have.

The reason why we of each denomination most value that which is distinctive to us is not simply because it is ours, but because we honestly believe it is the truth. It is our choicest possession. Without sacrificing our distinctiveness we want to realize our unity and solidarity as we gather 'round the figure of our Lord with open minds, responsive hearts and, I would say, hair-trigger wills—by that I mean wills that are eager to leap into action when we see a clear path.

MINISTERS COST LESS THAN AUTOS

World Survey Figures Reveal How Badly United States Is Paying Its Pastors.

What are the chances of a young man who intends to be a lawyer of making $3000 a year? What are the doctor's chances? What of the minister or the manufacturer?

The lawyer has exactly one chance in five. The doctor's chances are one in seven. It is ten to one against the manufacturer. The modern minister, however, who formerly ranked with the doctor and lawyer as a member of the "learned professions," has fallen hopelessly behind. He is a 100 to 1 shot.

These figures are part of a mass of astonishing facts brought to light by the world survey being made by the Interchurch World Movement and whose sources of information are such that many economists and statisticians are availing themselves of the results. This survey puts America's minister at the bottom of the ladder of the nation's income receivers—and with responsibilities which equal those of any captain of industry.

A worker in a silk mill, a laborer in a rubber plant, a paper maker, a worker in a shoe factory—all are getting higher average wages, the survey shows, than does America's minister, city or country. Nor does the city man receive the luxurious salary that many persons, including many country parsons, believe he does. Not four ministers in a thousand, according to the survey, receive $5000 a year. In no instance, whatever the denomination, does a majority receive $1000.

Are you a Congregationalist? In 2783 churches the yearly pay to your ministers has been less than $1000. Are you a Presbyterian? You are then on the less than $1000 list with 6415 ministers. In the event that you are a Methodist the charge is that 4719 pastors are trying to exist on the $20 a week that you pay them. Episcopalians do a little better, yet half of their rectors receive less than the $1500 a year which government economists regard as the minimum on which a family can be decently maintained.

The initial cost of the cheapest "flivver" on the market is less than $600, but a very good, conscientious pastor, it is shown, can be hired for a year for that sum.

Ministers in the South are preaching to fifty or more cotton pickers who individually are paid more for picking cotton than their entire neighborhood pays to the preacher in a year.

One of the aims of the present cooperation of the world's Protestant denominations is to end this disgrace of the underpaid minister. With universities, business houses and municipalities daily taking action to provide for the comfort of their workers, the church is to keep pace with the times, and to arrange not only for adequate pay for its workers, but to provide pensions for those no longer able to work.

It is to move the public to prevent unfavorable comparison of pastors and puddlers. Until then, as for a puddler swapping jobs with a pastor drawing an "ordinary" salary—never! The lowest salary paid to pastors is lower than any wages paid in the entire steel industry.

A WISE HOUSEHOLDER.

She—Oh, George, the water pipe has burst, and the water is spoiling the new hall carpet. Go and get a plumber quick!

He—That's all right my dear. Let it go; it's cheaper to get a new carpet.—London Answers.

THE WRONG WORD.

Daughter—A certain young man sent me these flowers this morning.

Papa—Don't say "a certain young man," my dear. There is none of 'em certain till you've got 'em.—Edinburgh Scotsman.

WHAT'S THE USE?

"You don't hear so much about elastic currency now."

"People are too busy trying to stretch their incomes to their needs to talk about it."

NOTICE OF ADMINISTRATOR'S SALE OF REAL PROPERTY AT PRIVATE SALE.

In the Superior Court of the State of California, in and for the County of Contra Costa.

In the Matter of the Estate of John Weaver, Deceased.

NOTICE is hereby given, that the undersigned, administrator of the estate of John Weaver, deceased, will sell at private sale to the highest bidder for cash in gold coin of the United States, subject to confirmation by said Superior Court, on or after Monday the 22d day of March, 1920, all the right, title, interest and estate of said deceased, or, in and to the following described real property, to-wit:

Parcel One—All that certain lot, piece, parcel or tract of land situate, lying and being in the county of Contra Costa, State of California, and more particularly described as follows, to-wit:
